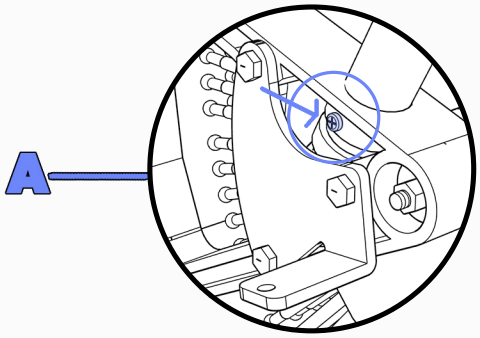
WEIGHT HOLDER INSTALLATION

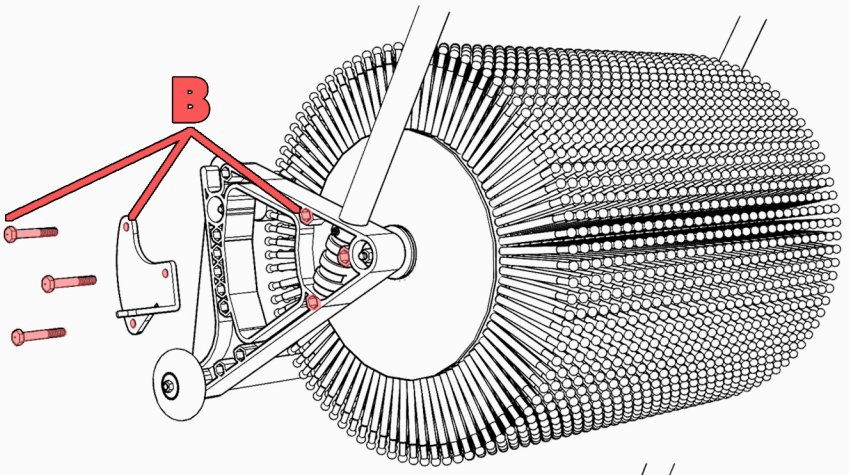
Watch Video for Easy Installation

Scan For Video

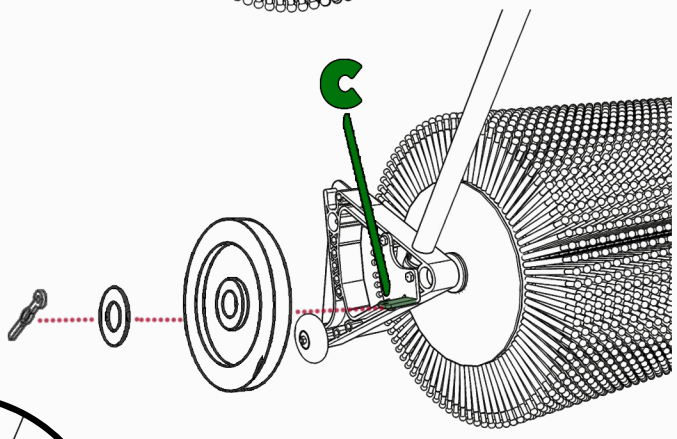
1 There is a left and a right weight holder bracket. Find the bracket in which the notch lines up with the Handle Screw for each side (See A). SEE VIDEO ABOVE FOR DEMO or visit https://www.baganut.com/weight-holder-installation-a

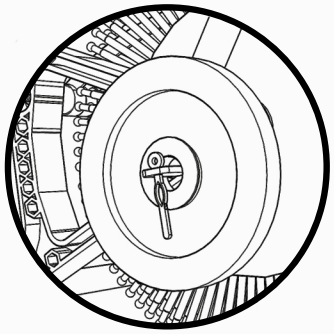


2 Screw the three bolts through the bracket and into the corresponding three holes on the side of the machine using a 7/16" socket or wrench (See B).



3 Slide your weight (5-10lbs recommended, 1" Diameter hole- **WEIGHTS NOT INCLUDED**) onto the protruding piece on the weight holder bracket (See C), followed by a washer and secure it by placing a pin through the bracket. You may need a mallet to gently force the pin in (See Final Assembly).





FINAL ASSEMBLY

ATTENTION UNITS MANUFACTURED PRE-MAY, 2025

NOTE: If your three bolts are not screwing into the side of the machine (Step 2), this could mean that your unit did not come with the reciever nuts pre-installed (Pre-May 2025 units only). Scan QR Code on right for assembly video or visit: ***https://baganut.com/weight-holder-installation-b***
